

African Map Template

Maps are fully customizable.

- Each country can be individually selected, colored, enlarged, copied, etc
- Countries can be grouped and edited together
- All text labels can be moved, and edited
- Entire Continent can be enlarged or reduced
- Continent can easily be copied to other presentations and a new theme applied

Directions

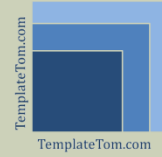

To Change Color

- Select a country (or multiple countries by holding in the 'Ctrl' key)
- Click on the *Shape fill* icon (a bucket) that will be available on the *Home* and *Format* panes on the Ribbon in PowerPoint
- Select the desired color for the selected Country/Countries

To Change Size of Continent

- First edit the map to your preference – (recommend working on slide 4)
- Remove unnecessary text labels – (Already done on slide 4)
- Select entire continent by pressing 'Ctrl' and 'A' keys together
- Right click on one of the highlighted boxes and select *Group*
- Resize grouped picture by clicking and holding on the corner of the image
- Right click on image and “ungroup” to make further edits (adding labels etc)
